Hiring Manager

Dear Hiring Manager,

I am excited to apply for an engineering internship position within your organisation. With a strong knowledge of pipeline engineering, industrial pipework, excavation, and BIM technologies, I am eager to contribute my technical expertise and leadership skills to a dynamic engineering team. My background in construction engineering, combined with my ability to manage field operations efficiently and collaborate with multidisciplinary teams, positions me well for this type of role.

Currently completing a master's degree at CESI Engineer School I have developed strong technical knowledge in structure analysis, geotechnical studies and construction project management.

Thanks to the work-study program I am currently working as a project engineer at SPAC (COLAS, BOUYGUES Group) which allows me to apply this knowledge in real-world projects. Having worked all across France, I'm comfortable travelling for work. I believe that mobility is essential to gain exposure to various construction methods and environments.

I also had the opportunity to work for Storengy, one of the biggest gas suppliers in France, where I contributed to gas installation and safety-focused field operations.

I am particularly drawn to organizations committed to delivering large-scale infrastructure with strong safety and quality standards. I regularly use AutoCad and BIM for modeling, estimating and optimizing workflows. I have also conducted site investigations, due diligence assessments, and prepared technical reports, which enhanced my ability to support field supervision and cost control processes. This experience helped me develop strong organizational skills and attention to detail.

Beyond my technical expertise, I bring strong leadership, problem-solving, and communication skills that enable me to work effectively under pressure in dynamic environments. I am highly motivated to apply my knowledge in a challenging internship that will allow me to grow professionally while contributing to meaningful projects.

I am available to begin the internship on May 4, 2026, and would welcome the opportunity to further discuss how my skills and experiences align with your team's objectives.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

RAUX Timothé

33000, Bordeaux FRANCE
